

Introduction

Meditronix Corporation, an ISO 9001:2015 & ISO 13485 : 2016 certified company has taken a giant leap with a humble beginning in 1979. We specialise in Radiation Detection, Quality Assurance, Protection, Dosimetry and many more practical applications for safe patient diagnosis and treatment. We serve Radiation Oncology, Nuclear Medicine, Radiology and many government nuclear establishments. We strive to work closely with our customers to design and provide quality products and solutions that meet their need at reasonable cost.

Our group company Radimage Healthcare India Pvt. Ltd. is one of the proprietary company recognised by the Atomic Energy Regulatory Board (AERB) for calibration of any kind of Radiation measuring instrument from any Imaging and treatment centre. We have a base of more than 2000 satisfied users across the country and abroad. We have calibrated over 15,000 instruments till date for India and abroad.

We are India's first and only AERB recognised and NABL accredited calibration laboratory (CC-1027) for comprehensive calibration of Nuclear Medicine Dose Calibrators. Apart from the Dose Calibrators, we calibrate any kind of radiation monitoring instruments like area monitors, survey meters, pocket dosimeters etc.

We have an excellent range of products for Nuclear Medicines. Complete hot lab setup from **Mirion Capintec** including Dose Calibrators, Thyroid Uptake System, Hot Cells, Shipping Systems. Being distributor for Biodex and Capintec for over 20 years, we have sold and supported over 650 Dose Calibrators across India. Radiation Monitoring Instruments from **Ludlum**, QA Phantoms & Imaging Solutions from **RSD**, Check Sources and a **large variety of indigenously designed Lead Shielding Products**.

Meditronix headquartered in Noida, distributes its products and services throughout India and across the globe. Promotional efforts include tradeshows, visits, advertisements and regular bulletin.

We have the required expertise to undertake any kind of repairs in radiation monitoring instruments, including pressurised Ion Chamber survey meters as we are equipped with necessary equipment and factory training, abroad.

We have an ambitious plan to enhance the manufacturing and calibration facility for various other modalities of cancer diagnosis and treatment. We would appreciate an opportunity to provide you solutions for your needs. You may reach us at 0120-2406096, 97, 4263270 or email us at info@meditronixindia.com.
